

Fastbind Spring Package 2: ONE Sense Ultra + Casematic H32 Pro

The **Fastbind ONE Sense Ultra** offers digital finishing a compact and versatile all-in-one solution for high quality PUR and EVA production. This compact machine is the most automated and flexible binder in the market. Sensors measure the length and thickness of the book and the program produces the correct number of roughening and gluing cycles as well as the nipping strength and time accordingly. You bind soft covers, hard covers, pads or stripes, from miniature to A4 + portrait or landscape and from one sheet up to 5 cm thick in seconds without long adjustments or settings. You create up to 1000 books per shift, whether they are all identical or unique.

When you want to create quality hard covers or cases quickly and economically, **Fastbind Casematic H32 Pro™** is for you. This compact, innovative table-top unit makes it easy to create custom hard covers for books and ring binders, cases, and much more. You produce premium cover in any formats, from miniature to 320 x 235 mm. Just design your cover, print it and just follow the easy steps on your Casematic H32 Pro to produce the cover in under one minute. It is fast and easy to use without set-up time or production stops between formats. This offer includes also the Fastbind Ha10 Corner Cutter.
